PROFESSIONAL EXPERIENCE

PLIVO

Software Engineer II

Bengaluru, India

Nov 2024 - Present

- Built **Vibe Agent**, a Claude Code-like agentic workflow system for building, running simulations and evaluations, and improving Voice AI Agents, reducing production-ready agent setup time from **~5 days to ~20 minutes**.
- Developed Truman, a **Voice AI Agent testing system** that runs automated calls in parallel across **hundreds of generated caller personas** and use-case-specific scenarios, with **agent skills, a CLI, and failure diagnostics**.
- Fine-tuned the **barge-in detection model**, reducing false interruptions by **95%** in voice-agent conversations.
- Built Akhada, a **debugging and evaluation environment** for testing **every layer of a Voice AI Agent**, including **VAD, EoU, STT, LLM, TTS**, prompts, configs, and agent behavior before production.
- Implemented **agent versioning** with **rollback support** and autogenerated change summaries, enabling users to improve Voice AI Agents without affecting live production agents.
