PROFESSIONAL EXPERIENCE

PLIVO

Software Engineer II

Bengaluru, India

Nov 2024 - Present

- Built **Vibe Agent**, a Claude Code-like system for building, running simulations and evaluations, and improving Voice AI Agents, reducing production-ready agent setup time from **~5 days to ~20 minutes**.
- Developed Truman, a **Voice AI Agent testing system** that places automated calls and stress-tests agents in parallel using hundreds of generated caller personas and use-case-specific scenarios; ships with skills and CLI.
- Fine-tuned the barge-in detection model, reducing false interruptions by **95%**.
- Built Akhada, a playground for **testing every layer of a Voice AI Agent**, including VAD, EoU (turn detection), STT, LLM, TTS, prompts, configs, and agent behavior before production.
- Implemented agent versioning so users can improve Voice AI Agents without affecting currently running production agents, with rollback support and git-style autogenerated change summaries.
