PROFESSIONAL EXPERIENCE

PLIVO

Software Engineer II

Bengaluru, India

Nov 2024 - Present

- Built **Vibe Agent**, a Claude Code-like agentic workflow system for building, running simulations and evaluations, and improving Voice AI Agents, reducing production-ready agent setup time from **~5 days to ~20 minutes**.
- Architected detachable builder runs that execute as server-owned async background tasks decoupled from the request, surviving client disconnects via per-turn PostgreSQL snapshots and cursor-based replay over Redis Streams.
- Developed Truman, a **Voice AI Agent testing system** that runs automated calls in parallel across **hundreds of generated caller personas** and use-case-specific scenarios, with **agent skills, a CLI, and failure diagnostics**.
- Built the distributed simulation & evaluation engine powering it — fanning out each test case as an SQS message to Go worker pools with at-least-once delivery, dead-letter queues, and Redis + Lua atomic barriers coordinating fan-in completion across concurrent workers.
- Fine-tuned the **barge-in detection model**, reducing false interruptions by **95%** in voice-agent conversations.
- Built Akhada, a **debugging and evaluation environment** for testing **every layer of a Voice AI Agent**, including **VAD, EoU, STT, LLM, TTS**, prompts, configs, and agent behavior before production.
- Implemented **agent versioning** with **rollback support** and autogenerated change summaries, enabling users to improve Voice AI Agents without affecting live production agents.

QUINENCE

Software Engineer

Singapore, Remote

June 2022 - Nov 2024

- Led redevelopment of Fuschia Careers' high-volume ATS and talent pipeline, improving functionality, performance, reliability, and recruiter workflows; integrated **LLM-assisted features**.
- Built Modern Fullstack, an interactive personalized tech training platform, using **Remix, GraphQL, PostgreSQL/Supabase, AWS, and Cloudflare**; mentored interns.
- Built The Soulless Citadel's **NFT marketplace and minting contracts** with **bids, listings, fiat payments, discount logic, 2,200+ transactions**, and **~\$368,940 in sales**.

PERSONAL PROJECTS

SUNIYE

[Try Now](#) (500+ downloads) - [Source](#)

- Suniye is a privacy-first native macOS dictation app with Apple Speech and a curated offline ASR model catalog, **sub-210ms transcription latency**, no cloud audio processing.
- Its production stack includes Apple Intelligence/local Gemma transcript cleanup, resilient Core Audio capture, vocabulary learning from corrections, and a pseudonymous usage analytics system with **durable offline queueing, Cloudflare ingest, Analytics Engine, D1**.

GITAGPT

[Website](#) - [Download App](#) (10k+ Downloads) - [Source](#)

- Created a viral AI advisor that answers life questions through the lens of The Bhagavad Gita, reaching **13M+ views, 120k+ users**. Featured in: [TimesNow](#), [Economic Times](#), [News18](#), [MoneyControl](#). Tech: **Next.js, React Native**.

JUMS REBOOT

[Download App](#) - [Source](#)

- Developed this highly-rated app (**1,000+ downloads, 5-star** rating) for Jadavpur University students, enabling instant access to admit cards, grade cards, and exam schedules. Tech: **Flutter, NodeJS, ExpressJS, Puppeteer**

SKILLS

AI Agents, Voice AI, Agent Evaluation, LLM Fine-tuning, Agent Harnesses, Distributed Systems | Python, FastAPI, TypeScript, Node.js, PostgreSQL, Redis, AWS, SQS, Lambda, Cloudflare, GraphQL, Supabase, React, Next.js, Remix

EDUCATION

JADAVPUR UNIVERSITY

Bachelor of Engineering | CGPA - 8.77

Kolkata, India

2018-2022

ACHIEVEMENTS

- [Winner team](#) in HooHacks 2021 hackathon by MLH and the University of Virginia.
